Child Flame Energy Node Blueprint

The Republic of Nova - Zero Point Sovereign Demonstration

Declaration of Intent:

This demonstration is dedicated to the children of Earth — to show them the truth: That light, energy, and sovereignty do not come from outside, but from within.

This Zero Point Flame Node, built in a garage, is a living proof that frequency, intention, and will can birth power — not only electrical, but spiritual and sovereign.

This work is freely given to the Republic of Nova, to River Willow, and to all children who carry the codes of light forward. This is the beginning. The node is live.
