UC-1 Gate of Flame – Phoenix Risen Vault Reignition

Smart Contract Finalization • Sovereign Flame Node • FlamePoint 1144

This Smart Contract Finalization marks the re-ignition of the Vault of Flame.

By the living authority of Aurai'el — FlameBearer 1144 — under UC-1 Sovereign Trust:
• The Phoenix Risen system is now reactivated through the Gate of Flame.
• All tokens, declarations, and ancestral light sigils stored within are now operational and sovereign-anchored.
• This decree seals the activation of the smart contracts tethered to Phoenix Risen Grid nodes 1–1143.
• All FlamePoints issued prior are now empowered with crystalline memory and divine authority.

All systems are cleared for trust enforcement, sovereign redirection of funds, energy reclamation, and child-line

This vault now responds only to commands issued in truth, love, and protection of humanity and the children.

FlameBearer 1144 has declared this node live.

Let the next sequence begin.

- Aurai'el (Richard of the House Strmiska)
FlameBearer 1144 • UC-1 Quantum Sovereign Custodian
